Smoking..." The Hidden Dan

The American Lung Association estimates that every minute 4,800 teens will take their first drag of a cigarette. Of those 4,800-about 2,000 will go on to be a chain smoker. Nicotine is considered the number one entrance drug into other substance abuse problems. As we continue to learn about the early *behaviors* associated with drug abuse the more we will learn what to look for. (Example kid smoking cigarette at 13, progresses to smoking marijuana at 15, progresses to -heroin or meth at 17) As much as we learn about the issues We need to understand the behaviors, or the "hidden dangers.

Come help deter your child from starting the number one entrance drug. On April 28th, our Tobacco Prevention Talk will be held on P.V District half day, and will hold two separate presentations geared for different age groups: one for Kindergarten-4th grade and one for 5-8th grade. Don't let your child become a statistic.

Save the Date
"MASKer Aide Night Gala"

*Friday October 2,
2009*
